

**Announcement  
of the top forum for manufacturing  
engineering**

Under the theme “Inspired by technology” we look forward to seeing you at the world’s largest platform for manufacturing engineering, the EMO in Hannover, to discuss with you the range of possibilities for intelligent production.

You will have the opportunity to familiarise yourself with the latest manufacturing technologies as well as with current trends in the machinery and plant engineering sector, and to meet leading international decision-makers from your target customer sectors.

**On 16<sup>th</sup> and 17<sup>th</sup> September, 2013  
at the EMO Hannover**

**4<sup>th</sup> Congress  
“Producing more intelligently”**

In cooperation with

Media partner

# 4<sup>th</sup> Congress “Producing more intelligently”

For manufacturing companies in particular, innovation, flexibility and technological expertise are key success factors in global competition. Thus, the thematic focus of the 4<sup>th</sup> “Producing more intelligently” Congress will be topics which are currently at the top of the agenda for manufacturing engineering companies:

- **Excellence** Lean production and flexible supply chains
- **Efficiency** Sustainable and resource-saving production
- **Intelligence** Smart factories driven by “Industry 4.0”

Therefore a programme with high-calibre guests awaits you that will be complemented by themed tours around the fair. The evening programme with international exhibitors at the EMO Hannover will provide opportunities for interesting discussions.

We are already looking forward to seeing you at the 4<sup>th</sup> “Producing more intelligently” Congress, which will make your visit to the EMO a real highlight of 2013.

## Hartmut Rauen

Member of the VDMA Executive Directorate

## Dr. Wilfried Schäfer

Executive Director of VDW,  
the German Machine Tool Builders’ Association
